# YOUR COMPLETE SOURCE

FOR MEDIUM VOLTAGE DRIVE REPAIRS AND REBUILDS

Industrial Repair Service is the industry's number one source for medium voltage drive repairs and rebuilds. Medium-voltage drives are one of the most process-critical pieces of equipment in heavy industrial operations such as power stations, petrochemical plants, forestry, mining, metal, water and wastewater treatment facilities, marine applications, subsea, cement, refineries, rubber factories, and HVAC systems.

Medium voltage drives can help facilitate a company's operational and business goals. If your power cell or power module is past its life cycle or needs repair, give us a call. Our technicians are fully equipped to test and repair medium voltage drives.

With over 30 years of industrial electronic experience we can replace IGBT's, bus capacitors, loose connections, printed circuit boards, and any other electrical components. When your power cell fails, you need to know who to call. Being prepared ahead of time can help you avoid any costly downtime.

**Some common medium voltage drive OEMs we service are listed below. Contact us if you do not see your unit listed. A complete list of equipment and brands we service is available on our website.**

ABB  
Allen Bradley  
Cutler-Hammer  
Danfoss  
Eaton

Fuji  
General Electric (GE)  
Hitachi  
LG  
Rockwell

Schneider Electric  
Siemens (Robicon)  
Toshiba  
WEG  
Yaskawa

Flat Rate Quotes | 18 Month In-Service Warranty on Servo Motors, Robots, and Valves  
24 Month In-Service Warranty on Electronics | Average Turnaround 7-10 Work Days
