YOUR COMPLETE SOURCE

FOR METAL DETECTOR REPAIRS AND METAL DETECTOR REBUILDS

Industrial Repair Service provides a comprehensive repair service for product inspection equipment. Our technicians can calibrate, repair, and rebuild a number of components off of metal detection equipment.

Our services include complete aperture renewals, water damage restoration, and repair and rebuild of conveyor systems. We can calibrate and test to your product specifications to ensure the passing of internal and external product inspections.

Below is a list of OEMs we commonly repair. Contact us if you don't see your brand listed. For a complete list of equipment and brands we service please visit our website.
